

FOR IMMEDIATE RELEASE

MIRUS™ SEATING COMBINES FUNCTION, COMFORT AND SLEEK DESIGN TO ENHANCE EMPLOYEE PRODUCTIVITY

Greater productivity starts here—with The HON Company's new Mirus™ chair. It offers consumers an easy-to-use, supportive seating option with the benefits of a higher priced chair... without the high price.

- Mirus combines intuitive functionality, comfort and style.
- Created by notable designer Wolfgang Deisig.
- Innovative Synchro Motion feature allows the chair to effortlessly recline with your body's natural movements... the backrest reclines two-and-one-half times faster than the seat... resulting in a more comfortable reclining position with better support.
- Mirus' side-access tension knob needs less than four complete turns, as compared to the usual 30-plus turns with other chairs, which makes it easier to find and operate.
- Four-position lock gives users the flexibility to lock Mirus in a number of positions: from the upright position, Mirus has one forward-tilt option and three reclining positions.
- Mirus offers a full four-inch range of adjustable lumbar support. Lumbar controls are located on the back of the chair for easy adjustment—even while seated.
- Mirus' seat glide provides three-and-one-half inches of adjustability, allowing the user to move the seat forward or back in relation to the chair's base.

- Mirus' arms move up and down and in and out, and the seat height adjusts to a variety of positions.
- Full family of seating options available, including work (low-back and mid-back), task stool and guest chairs with stacking capability.
- Offered in a wide variety of upholsteries to complement any office décor.
- Backed by The HON Company's Limited Lifetime Warranty.
- Mirus is certified Indoor Advantage™ Gold for indoor air quality by Scientific Certification Systems (SCS) and contributes to maximizing valuable Leadership in Energy and Environmental Design® (LEED) points.
