

LATERAL FILES

Advantages:

a) The most efficient means of conventional filing; b) Ideal for active filing in workstations, where higher volume capacity is necessary and retrieval is frequent

Considerations:

2-drawer steel lateral files fit under standard-height worksurfaces when using panel systems.

BOOKCASES

Advantages:

a) These units are ideal for binders, reference books or other items; b) Available with your choice of fixed or movable shelves

Considerations:

If working with panel systems, it is more attractive to specify units that are lower than the panel height.

VERTICAL FILES

Advantages:

a) Economical; b) The most widely used filing method; c) requires minimal floorspace

Considerations:

Vertical files are best suited for long-term storage, where retrieval is less frequent. For larger banks of files, lateral files are more space-efficient than vertical files.

SHELF FILES

Advantages:

a) The highest density method of filing; b) Specially designed for end-tab long term filing

Considerations:

Ideal for medical or dental offices, available as open shelves or with flipper doors.
