HON PRODUCT SELECTION GUIDANCE

As of May 2016, HON products can meet the Safer Chemicals Challenge of the Healthier Hospitals Healthy Interiors Goal version 2.0 (December 2015) by using the following guidance. Customer choice plays an important role in avoiding undesired chemicals and treatments. Furniture and options specified must meet all criteria below.

1. Formaldehyde*

The HON Company furniture that is Indoor Advantage Gold certified qualifies certificates are publicly available at <https://honready.hon.com/pc/Pages/IndoorAdvantageCertificates.aspx>

The certificates clarify any exceptions, such as the use of some finishes or specific setting.

2. Perfluorinated Compounds (PFCs)*

PFC-free fabrics are available. Customers are responsible for their COM fabric content.

3. Polyvinyl Chloride (PVC)*

To avoid PVC, order HPL Systems Worksurfaces with Edgeband. Avoid specifying a curved worksurface, as these can require PVC. Vinyl upholstery must be avoided.

Some small PVC parts and PVC edges make up less than 1% of the weight of a worksurface or table so could still be accepted in an HHI project. Electrical components may contain PVC, but are exempt from HHI guidance.

4. Antimicrobials*

Antimicrobial-free fabrics are available. Customers must be responsible for the COM fabric content.

5. Flame Retardants*

All products qualify unless specifically ordered as "Fire Code" models or to meet CAL133. Vinyl upholstery, some polyurethanes, and most high-performance textiles must be avoided. Customers must be responsible for Customer's Own Materials (COM) fabric content.

*Please note that it is not feasible to provide laboratory testing data for every variation of product and material. The HON Company has worked with our suppliers to determine whether the chemicals and treatments listed are included in products above the guideline threshold limits. Customers are responsible for the chemical content of COM fabrics.

The HON Company reserves the right to change materials without notice but will continue to meet HHI goals. Please confirm conformance to Healthy Interiors 2.0 goal at time of specification. For additional information, please contact HON Customer Support at: HONCustomerSupport@honcompany.com
