

MADE IN THE USA

Born in the USA. Made in the USA.

At the end of World War II, HON began designing and manufacturing products for the home and office in Muscatine, Iowa, the heartland of America. These practical solutions inspired productivity and helped workers everywhere chase the American dream. Nearly 75 years later, we remain committed to designing, engineering and assembling all HON products right here in America. This gives us the chance to oversee every step of a product's life cycle, while also supporting a robust American workforce.

Why should you care about buying American? Besides the obvious benefit of helping workers and companies in our own country thrive, HON customers get confidence. Because we have direct oversight of every stage of product development, we know we're making durable products of the highest quality. This allows us to offer the strongest warranty in the industry, the HON Full Lifetime Warranty. A promise other furniture manufacturers aren't willing to make.

(TOP) Welder assembles parts at a plant in Muscatine, Iowa.
(BOTTOM LEFT) Member carefully assembles chair seats.
(BOTTOM RIGHT) Two members work together to assemble laminate casegoods.

From the Heartland

At HON, we've been delivering inspired practicality since 1947, when we began repurposing the scrap metal generated from our contract furniture business into card files. This evolved into the creation of the very first vertical file cabinet, a product HON practically invented and continues to improve upon to this day. Look for the icons below to see if your product series is Made In The USA.

When you buy HON office furniture, you're not just buying inspired, practical solutions - you're buying quality, American-built furniture, backed by a lifetime warranty and a network of dealers.

When you buy HON office furniture, you're not just buying inspired, practical solutions - you're buying quality, American designed, engineered and assembled furniture backed by a lifetime warranty and a network of dealers.

(TOP) Kitchen recipe boxes were transformed into card files for the office by painting them green.
(MIDDLE) The 2- and 4-drawer nonsuspension files were introduced in 1952.
(BOTTOM) Our material combinations allow you to express your company's brand and culture.

(TOP) Edgeband varieties give your company options to design office furniture with all styles in mind.
